PROJECTS

DIRECT FARM MARKETING

Frontend Developer

- Frontend :HTML,CSS, JavaScript.
- Backend :Python.
- Objective: Our platform allows farmers to sell their products directly to consumers without the help of middlemen. All they need is a Gmail account to get started. Once logged in, they can upload their products along with their details and price. Consumers who want to buy the products must log in with Gmail, then they are able to see products and can contact farmers for purchase.

HOSPITAL WEBSITE

- Frontend:HTML,CSS.
- Objective: Using a website for hospitals, users can book an appointment and get information about what kind of services are offered and departments, as well as the hospital address, contact information, and information about doctors will be shown in the website.

MOVIE TICKET BOOKING

- Frontend:HTML,CSS,JavaScript.
- Objective: By implementing this project, I have created a way for users to book movie tickets online by clicking on now playing, the user will be presented with current movies. Then, the user will select the seats, pay for the seats, and the tickets will be reserved.

ONLINE QUIZ

- Frontend:HTML,CSS,JavaScript.
- Objective: A user will have to answer the following questions regarding frontend technologies, then the quiz will show the score based on the correct answers.
